
FinPay Mobile App — Design Report

1. App Overview

- FinPay is a modern mobile fintech application designed for seamless personal finance management
- Built for users who need a secure, fast, and intuitive digital banking experience
- Covers core financial operations: payments, card management, analytics, and account security
- Target audience: millennials and professionals aged 22–45 seeking an all-in-one digital wallet

2. Design Philosophy

- Dark-themed UI with deep navy base (#0B0E1A) for reduced eye strain and premium feel
- Electric violet (#7C6FFF) used as primary accent for CTAs and active states
- Mint green (#00D4A1) for positive values; coral (#FF6B6B) for alerts and debits
- Rounded corners, gradient cards, and layered surfaces create a modern glassmorphism aesthetic
- Consistent 5-tab bottom navigation across all screens for intuitive flow

3. Screen-by-Screen Breakdown

Screen 1 — Login / Onboarding

- Email and password fields with inline validation and forgot password link
- Social login options: Google, Apple, Facebook
- Biometric authentication (Touch ID / Face ID) for returning users
- KYC verified badge displayed prominently to build user trust

Screen 2 — Dashboard

- Personalized greeting with user avatar and notification indicator
- Total balance card with gradient background and live sparkline trend chart
- Quick action buttons: Send, Receive, Top Up, More

- Recent transactions list with category tags, color-coded amounts, and merchant icons

Screen 3 — Send / Transfer

- Recipient search with recent contacts displayed as avatar row
- Large amount input with quick-select preset buttons (\$50, \$100, \$250, \$500)
- Optional note field for transaction reference
- Fee breakdown panel showing transfer fee, exchange rate, and total before confirmation

Screen 4 — Card Management

- Physical card displayed with gradient design, chip detail, masked card number, and expiry
 - Four toggleable controls: Freeze Card, Online Payments, International Use, Contactless
 - Color-coded toggles — active in violet, inactive in grey
 - Daily spending limit progress bar with percentage indicator
 - Virtual card generation option
- ### Screen 5 — Analytics
- Monthly tab selector with active month highlighted in violet
 - Total monthly spend figure with month-over-month comparison chip
 - Weekly bar chart with the highest-spend week highlighted in accent color
 - Category breakdown with progress bars: Food & Drink, Shopping, Transport, Subscriptions
 - Budget alert banner when a category nears its limit

4. Key Features

- **Security** — Biometric login, KYC compliance badge, card freeze toggle
 - **Real-time Insights** — Sparkline on dashboard, weekly bar charts, category breakdowns
 - **Smart Transfers** — Quick-select amounts, zero transfer fee, instant recipient search
 - **Card Control** — Full card management without visiting a branch or calling support
 - **Budget Alerts** — Proactive notifications when spending approaches set limits
-

5. Technology & UX Principles

- Mobile-first design optimized for iOS and Android screen sizes (340×680 base)
- Consistent component library: pills, toggles, progress bars, avatar circles, gradient cards
- Color accessibility maintained — all key text passes contrast requirements on dark backgrounds
- Navigation follows thumb-zone ergonomics with bottom tab bar throughout
- Micro-interactions planned for button press, toggle switch, and card flip animations

6. Conclusion

- FinPay delivers a complete digital banking experience in a clean, premium dark UI
- The five core screens cover the full user journey from login to spend analysis
- Design is scalable — additional screens (Loans, Investments, Support) can follow the same system
- Ready for handoff to development using the defined color tokens, typography scale, and component structure
